

Keyboard: Ghana Unicode – Safaliba variant

Introduction

This keyboard is used for typing the alphabet of the Safaliba language of Ghana. It is the same as the Ghana Short keyboard with two additional vowels and high tone, low tone and nasalization markers.

Keystrokes Used

The following keys are modified by this keyboard:

[→ ε	{ → Ε] → ɔ	} → Ɔ	= → η	+ → Ɔ
x → ɛ	X → E	q → ɔ	Q → Ɔ		

The Safaliba keyboard uses apostrophe ('), grave accent (`), and tilde (~) for the corresponding combining diacritics, ́, ̀ and ̃. They can be stacked. Type them following the character they will modify:

' → ́	` → ̀	~ → ̃	E.g.: a' → á	x` → è]~ → ð	q~` → ẽ
-------	-------	-------	--------------	--------	--------	---------

;(semicolon key) followed by any of the above keystrokes gives the original character:

:[→ [;{ → {	;] →]	;} → }	;= → =	;+ → +
;x → x	;X → X	;q → q	;Q → Q		
; ' → '	; ` → `	; ~ → ~			

The Keyboard Icon

The icon for the keyboard is:
