Keyboard: Ghana Unicode – Nkonya Variant

This keyboard also implements the same character modifications as the Ghana Unicode Short keyboard along with some additions:

[→ ɛ	{ → Ɛ	] → ɔ	} → Ɔ	= → ŋ	+ → Ŋ
x → ɪ	X → ɪ	q → ʊ	Q → Ʊ		
'a → á	'A → Á	'e → é	'E → É	'[→ ɛ́	'{ → Ɛ́
'i → í	'I → Í	'x → ɪ́	'X → ɪ́	'o → ó	'O → Ó
'] → ɔ́	'} → Ɔ́	'u → ú	'U → Ú	'q → ʊ́	'Q → Ʊ́

As with the Ghana Unicode Short keyboard, ; (semicolon key) followed by any of the above keys gives the original character.

The high tone diacritic that can be entered: high tone (´). To prevent the diacritic from appearing, type ";" before the diacritic. (;'a produces ´a, not á).
